ERTmiral

Our web-based order management system ERTmiral enables simple and efficient control and monitoring of mobile robots from different manufacturers in a fleet.

ORDER MANAGEMENT - AUTOMATION - FLEET MANAGEMENT

ERTmiral

Process management

Seamless integration into your production control system. Connects mobERT® and other systems. Automatic order management from ERP/MES systems without additional control.

Mobile manipulators

First fleet manager that controls complete processes for mobile manipulators as a complete system - with tool changers, grippers, vision systems & sensors.

Connectivity

Connection and control of machines for managing transfer processes.

Scale efficiently

Unlimited number of users, AMRs and manipulators, parallel access to the UI.

Carefree maintenance

Quick commissioning and easy maintenance in service mode.
